

IBM Tivoli

Storage Manager FastBack

Tivoli Storage Manager FastBack gives you the power to quickly restore critical Windows applications and data, anywhere in the organization, from any previous point-in-time, no matter what happens to cause a data loss. TSM FastBack also makes it possible to provide users with access to critical business applications without waiting for the entire recovery process to be completed, getting your business up and running sooner.

Customer Pain Points

- Control storage costs even though data continues to grow exponentially.
- Control increasing people and operational costs due backups consuming too much hardware and people resources.
- Automate data protection and restore to eliminate data loss due to disasters, hardware failures, viruses, and user errors.
- Ensure consistency and reliability of data backups.
- Protect data in remote or branch offices.

Solution Business Benefits

- Elimination of backup windows and manual backup/restore processes.
- Near instant recovery and rapid access from any type of data loss.
- Secure transfer of data between primary and disaster recovery site.
- Reduce storage related costs through data reduction.
- Eliminate the need for tape in remote branch offices.
