## Comprehensive Data Protection Solution

The Comprehensive Data Protection solution provides the power to quickly restore any amount of Microsoft® Windows® data, anywhere in the organization, from any previous point-in-time, no matter what happens to cause a data loss.

The Solution provides :

- Data Protection Flexibility – Enables scheduled, frequent and continuous protection of data and applications from a single platform
- Unmatched Recoverability – Enables file, volume, bare-metal and granular recovery from a single image, providing full recoverability for Less Storage

### Customer Pain Points

- Meeting service level objectives and providing continuous availability of valuable files
- Tighter IT budget and need to reduce capital expenditures
- Shortage of skilled people resources
- Demands in storage capacity and corresponding cost of management
- Security of data and recoverability in the event of loss, theft or disaster
- Regulatory compliance for data retention

### Solution Business Benefits

- What can go Wrong: Remote office staff forgets to run the backup, or they do it wrong  
Respond with Comprehensive Data Protection Solution: Automated, non-disruptive backup occurs during normal business hours in the background
- What can go Wrong: Accidental or malicious deletion of critical files  
Respond with Comprehensive Data Protection Solution: Open the browser and drag and drop the files you want back to where you need them
- What can go Wrong: You discover that a critical database has been corrupted (maybe by a virus) for the past couple of weeks  
Respond with Comprehensive Data Protection Solution : Pick the point-in-time that you want to recover from and initiate a Virtual Restore—the entire database will be made available within seconds
